

UFO's

This class takes 8 weeks. It answers questions and statements like this:

Are UFO's real?

Are they aliens from another planet?

They must be real because there are so many sightings!

The universe is so big and

there are so many stars & planets,

there must be other people out there!

If all of these sightings aren't real,

then offer a better suggestion!

What are "close encounters"

What about Roswell? What

about Area 51?

What about the Philadelphia Experiment?

What about all of those alien abductions?

Is there a spiritual/biblical connection to UFO's?
