

Is there life after death?

Week 3...

One young boy, Colton Burpo, who was in the hospital for a burst appendix and almost died, told his parents that he met his “other” sister in heaven in his NDE. That she had died in “mommy’s tummy”. His parents had never told him of his mother’s miscarriage. His Mom asked what her name was. He replied that they hadn’t named her. This was correct. His parents didn’t even know she was a “she”. **He told his parents that God had adopted her (page 94-97, the book “Heaven is for Real” by Todd Burpo).**

Todd, Colton’s dad and a minister, once showed Colton a picture of Todd’s grandfather. He was old and wore glasses. He told Colton that he was his great-grandfather. Colton said that nobody wears glasses and nobody is that old in heaven. Todd was skeptical, so he called his mother up and asked her if she had an old picture of his grandfather when he was young. She said yes, but it was taken in 1943, over 60 years ago. Todd showed it to Colton and asked him if he knew who it was. **Colton said it was his great-grandfather as that was what he looked like when Colton saw him in heaven.** He then asked if he could go out and play! Colton was 4 years old at the time of this incident. Colton was born in 199. Todd’s grandfather died in 1975 (page 120-123 from the same book).

In London, England a single mom was admitted to Memorial Hospital with severe bleeding. Suddenly, she had a very clear view of her body on the hospital bed. She was looking at it from the ceiling. She noticed a red sticker on the side of the ceiling fan blade facing the ceiling. She went thru a tunnel toward the light, a light that embodied a love like she had never felt before. She knew in her heart this was God. Her life reviewed before her. Every good and bad deed she had ever done and the effects that they had on others. But she didn’t feel condemned. She felt unconditional love thru it all. Suddenly she popped back into her body. When she told a nurse about her experience, the nurse verified it by looking at the back of the ceiling fan. It had a red sticker on it that she could not have seen unless...

One color-blind NDE’er saw “a magnificent landscape full of flowers and plants...a thousand times more beautiful than anything I have ever seen.” Another NDE’er had 360 degree vision. Our earthly eyes cannot see ultraviolet or infrared colors, yet many NDE’ers describe seeing these colors. One NDE’er said that the grass seemed to be translucent. Its color seemed to be alive, dancing in the air. Others described them as the deepest, richest, most lush colors they have ever seen. From forests, to trees, to landscapes, to valleys, to mountains, to rivers...everything seemed to be alive.

Captain Dale Black described it as follows...(page 101-106 from the book “Imagine Heaven” by John Burke). All of this is described in the bible. Read Revelation 7:9, 17 21:10-12, 19, 23 22:1, 2.

Remember, earth is just a shadow of what heaven is like (Hebrews 8:5). Randy Alcorn,

author of the book "Heaven", says that the verses in Hebrews 8 suggests that God created Earth in the image of heaven just like He created mankind in His image. **Eventually, all of creation will be redeemed (Romans 8:20-21).** But the heaven of Hinduism or Buddhism or Islam is NEVER described like this. Hindu, Buddhist and Islamist NDE's match up with that of the bible, not their own religious views of the afterlife.

How could these people know these things unless they really happened?
